SUMMARY

Motivated and innovative Full Stack Developer with a degree in Electronics and Communication Engineering. Experienced in various programming languages and software design tools, complemented by professional exposure through internships at MCF Hassan and Vihaan Technologies.

WORK EXPERIENCE

Digital Jacquard and Punched Cards   Mar 2024 - Dec 2024
- Developed an innovative system capable of processing complex patterns through a digital jacquard setup.
- Designed the hardware interface and implemented control logic using C, showcasing the ability to integrate software with hardware components effectively.

Internship at Vihaan Technologies, Bangalore   Nov 2023 - Dec 2023
- Engaged in software development projects, employing C and basic Python to automate processes and improve system efficiency.
- Contributed to team brainstorming sessions, offering creative ideas for enhancing user interface design and experience.

Internship at Master Control Facility, Hassan   Oct 2022 - Nov 2022
- Participated in industrial visits to gain practical insights into the manufacturing and testing of electronic components and systems.
- Observed and learned about the working principles of cables, circuits, and electronic assemblies in a real-world industrial environment.

EDUCATION

Full Stack Java Web-Development Course   Feb 2025 - Present
Global Quest Technologies
- Relevant coursework in Full Stack Development and Project Management.

Bachelor of Electronics and Communication Engineering   Dec 2021 - Present
Visveswaraya Technological University
- Specialization in Circuit Designs.
- Thesis on "Innovations in Sustainable Engineering Practices".

ADDITIONAL INFORMATION

- **Programming Languages:** C, Basic Python
- **Design Software:** Adobe Photoshop, Adobe Illustrator, CAD Design
- **Web Development:** HTML, CSS, JavaScript (basic knowledge)
- **Tools & Technologies:** Git, Node.js (familiarity)
- **Soft Skills:** Problem-solving, Team Collaboration, Adaptability, Time Management
